Dear Council officers working on this case,

I am just trying to provide more background information on the illegal parking in Cavanstone park. Attached below (Winnie's Removal of Signs.pdf) is the original "Line-marking and Signage Plan" prepared by AV Jennings for approval by the Parramatta Council.

On the sheet/PDF, there are two marked red circles denoted: Signs removed by XXX.
Yes, there are traffic signs approved by the council has been removed by this individual

This individual removed the no-parking sign just to create a personal parking right by her front door. The following photos shows where the location of the remove parking sign. Unfortunately on this particular day, someone else beat her to the space, she choose to park on the lawn for her own convenience.

This is where she usually park and it is right by her house, and **PREVIOUSLY** marked by a No-Parking sign.

Ever since the sign removal, many people follow the same parking behavior. At one time, there are three different cars parked there.

Hopefully I have provided enough information about the potential breach of local traffic regulation. After all there are reasons for Builders like AV Jennings to prepare plan for Council Approval. Now this plan is apparently broken!

This is Australia! I don't believe individuals can simply create personal parking space by removing Parking Signs on public/shared road space. There are more evidence (can be provided if requested) that this individual attempt to intimidate, bully members of this community to achieve her purpose.

Regards

Vincent
